

# Investigating Life Forms

All your equipment has been put in the observation hide for you, and the padlock code relates to the times tables! Ask me for the questions.

Take the Antworks box and a collecting pot. Search for some ants. They like to live under stones. Ask an adult to help you lift some big ones, like paving slabs.

Open the Antworks box, read the instructions. Set up the ants' home and put them in.

The ants need a shady place. Find somewhere in the moonbase that will suit them.

If you have time...go back to the observation hide. Take a pond dipping net and the small fish tank.

Go to the pond and collect as many different life forms as you can.

Use the information on the walls of the hide to identify the different creatures.
